HARRIET MUMBUA KYALO
Nairobi, Kenya · +254 723 112 295 · harrietkyalo22@gmail.com
LinkedIn · Portfolio

Early-career IT professional who has completed the coursework for a Bachelor of Science in Computer Science, with an Upper Second Class classification, and is awaiting formal graduation in October 2026. Hands-on experience in IT support, systems administration, user access management and information management gained through industrial attachments at the Council of Legal Education and the Kenya National Bureau of Statistics. Practical exposure to system configuration, data integrity, confidentiality and security controls, complemented by cybersecurity training and technical projects. Analytical and detail-oriented, with strong troubleshooting, documentation and problem-solving skills and an interest in information systems audit and IT risk management.

SKILLS

Technical Skills:

- **IT Support & Troubleshooting:** End-user support, hardware and software troubleshooting, Windows troubleshooting, connectivity troubleshooting, technical issue resolution
- **Systems Administration:** Windows 10/11, Windows Server, Active Directory, Group Policy (GPO), user and group management, domain administration, VMware
- **Networking & Security:** TCP/IP, IP addressing, subnetting, VLANs, pfSense firewall, RADIUS/NPS, access control, security event monitoring
- **IT Operations:** Software installation and updates, system maintenance, user onboarding, data integrity and confidentiality

Professional Skills:

Analytical thinking, problem-solving, attention to detail, communication, presentation skills, teamwork and collaboration, adaptability, time management

EXPERIENCE

Industrial Attachment - Information and Communication Technology(ICT)
Council of Legal Education | May 2025 – July 2025

- Provided technical support to staff, diagnosing and resolving hardware, software, and connectivity issues while responding to user needs in a timely manner.
- Worked collaboratively with the ICT team on network, systems, and security-related tasks, applying structured problem-solving and attention to detail when troubleshooting technical issues.
- Collaborated with the Records Department to digitize and organize 1,000+ institutional records in the DSpace repository, ensuring accurate classification, structured storage, and efficient retrieval of digital information.
- Supported user administration and Windows Server activities, including account provisioning, user and group management, and domain configuration under supervision.
- Participated in networking and virtualization activities using VMware, pfSense, VLANs, and DNS, strengthening analytical and technical troubleshooting capabilities.
- Followed established procedures and adapted to different technical tasks and user requirements while supporting day-to-day ICT operations.

Industrial Attachment - Corporate Service Directorate (ICT Division)
Kenya National Bureau of Statistics (KNBS) | July 2024-September 2024

- Participated in a 20-day Gross Domestic Product Monthly Survey of Industrial Production (MSIP) across 55 industries, achieving a 98% response rate as part of a 10-member team.
- Supported maintenance and troubleshooting of 50+ computer systems, identifying hardware and software issues and potential security risks.
- Provided IT support to staff, troubleshooting technical issues within defined service timelines.

- Assisted with the secure processing and verification of 1,000+ institutional records, ensuring accuracy, integrity, and confidentiality while following established data-handling procedures.
- Supported ICT system upgrades and routine maintenance activities in line with internal IT procedures.
- Supported end-user training and onboarding for new systems, helping users adapt to new processes and tools.

EDUCATION

THE CATHOLIC UNIVERSITY OF EASTERN AFRICA
Bachelor of Science in Computer Science | Awaiting Graduation: October 2026

Relevant Coursework: Information Security Fundamentals, Ethical Hacking, Computer Networks & Network Security, IT Governance & Compliance (ISO 27001, NIST), Cybersecurity Incident Response

CERTIFICATIONS & TRAINING

Cisco Networking Academy: Cybersecurity Defense Analyst Career Path | Verify Credential
(ISC)²: Certified in Cybersecurity (CC) | Verify Credential
Microsoft AI Skills Fest Training | Verify Credential
IBM SkillsBuild: IBM Cybersecurity Fundamentals | Verify Credential
AFRALTI: Basics in Cyber Security, Blockchain, Data Science, Cloud Computing, AI, and Professional Skills

PROJECTS

GRC Assessment – Pediatric Clinic Appointment Scheduling System (PCASS)
Independent Project | Ongoing | October 2026 – Present

- Developing a risk register and mapping controls to NIST CSF 2.0, ISO 27001:2022 and Kenya's Data Protection Act, 2019.
- Preparing audit test sheets, findings register and executive summary.

Phishing Email Investigation & Incident Triage — Independent Project | September 2026
Simulated security investigation

- Investigated a simulated phishing email using email header analysis and sender/return-path indicators.
- Analysed SPF, DKIM and DMARC authentication results and reviewed suspicious indicators using MXToolbox, VirusTotal and URLScan.io.
- Assessed the available evidence and documented findings, indicators and incident-triage conclusions.
- Produced an incident report documenting the investigation and findings.

Enterprise Networking Lab- Council of Legal Education (CLE) | June 2025
Completed during ICT attachment

- Configured Windows security event logging and RADIUS authentication using NPS and Active Directory to support user monitoring and access control.
- Deployed and tested a FreeBSD DNS server and integrated Windows clients, troubleshooting connectivity and name-resolution issues.
- Applied practical networking and systems administration concepts in a controlled environment.

PfSense Firewall Installation, VLAN Setup &Management- Council of Legal Education(CLE) | July 2025

Hands-on firewall and network segmentation lab completed during ICT attachment

- Installed and configured pfSense in VMware ESXi and created five VLANs to segment network services.
- Implemented firewall rules based on least-privilege principles, including isolation of guest Wi-Fi and CCTV traffic.
- Tested network connectivity and access controls to verify the effectiveness of the configuration.
